

## PRODUCT INTRODUCTION

The **Saeco SE** caters to small to medium-sized environments with its intuitive touch screen, modern design, and cafe-quality coffee experience. Its easily removable milk system with a concealed milk tube ensures convenient cleaning and safety, making it an ideal addition to any setting.

**Dual boiler** and piston pump prioritize speed, capacity, and volume, enabling simultaneous coffee and milk production.

**Fresh milk system** delivers exceptionally smooth microfoamed milk with adjustable temperature settings and programmable automatic flush milk cleaning.

**10.1-inch touch screen**, allows customization of up to 30 drinks and the option to upload drink recipes, images, and branding via USB.

**Ceramic coffee grinding blades** for longevity and reduced noise, this machine ensures the perfect crema, aroma, and taste in every cup.
